

What Problems Do Lawyers Face in Controlled Drug Analyses?

- ✓ High volume case loads lead to analysis errors
- ✓ Chain of custody breaks in testing procedures lead to commingling of cases
- ✓ Drug conspiracy case dismissed by contaminations in testing
- ✓ Weighing errors signal credibility issues, including case switching
- ✓ Detected weighing discrepancies using our weighing service lead to lower sentencing
- ✓ Clandestine laboratory synthesis succumbs to viability of synthetic steps and product

These are some of the successful findings accomplished through a special new approach developed by **VINGRAM Enterprises Ltd.** For more information, visit our website at www.vingramenterprisesltd.com or contact us via email at www.vingram@vingramenterprisesltd.com.
